

Akston Biosciences has an immediate opening for **Senior Research Associate I - Pharmacology**.

Title **Senior Research Associate I - Pharmacology**

Primary Duties

- Assist and lead in ongoing *in vivo* studies by providing hands-on technical support and performing assays.
- Produce reliable and precise data to support scientific investigations, mainly by running Enzyme-Linked Immunosorbent Assays (ELISA).
- Perform a variety of laboratory research tasks, dependent on research study.
- Conduct *in vitro* experiments and collect supporting data.
- Follow Standard Operating Practices (SOP) related to specific laboratory tasks/assays.
- Support conduct of analyses, analyzing scientific data, interpreting test results, and compiling results into assay or technical reports.

Other Responsibilities & Skills

- Keep detailed records of data and appropriately document experimental procedures and results according to established guidelines.
- *In vivo* skills: animal handling (mice), IP, SC, IV dosing (mice), submandibular blood collection.
- Assist in ordering of lab supplies.
- Must be capable of multi-tasking, working both independently and within a team environment.
- Strong communication and interpersonal skills.
- Ability to help develop solutions to complex problems and establish processes to continuously improve and streamline existing procedures.
- Good organizational skills with ability to adapt to changing priorities, to multi-task in a fast-paced and dynamic environment and to meet challenging timelines.
- Expertise in Excel, Prism, PowerPoint, Softmax, etc.

Qualifications

A bachelor's degree in Biology, Biomedical, Pharmaceutical Sciences or related field with 3+ years of industry experience in pre-clinical or laboratory research, or a master's degree with 1 – 3 years of work experience.

Compensation Title and pay commensurate with skills and experience, eligibility for company benefit plans.

Other Must live within commuting distance of Beverly, MA.

Company Akston Biosciences Corporation invents, develops, and manufactures breakthrough protein therapeutics for Companion Animal Health. We leverage our novel Ambifect™ Fc-fusion platform to develop and manufacture new classes of therapeutics. Additionally, Akston serves as a Contract Manufacturing Organization (CMO) for other

Animal Health companies through production and manufacturing facilities that are dedicated to Animal Health. Our facilities, along with our research and process development laboratories, are located in Beverly, Massachusetts.

Akston has an immediate opening for a **Senior Research Associate I - Pharmacology** position in Beverly, MA. For more information, see www.akstonbio.com.
